

SOMEONE YOU LOVE

THE HPV EPIDEMIC

FREE FILM VIEWING

~ An extremely educating and eye opening documentary that provides real stories of five women and how HPV affected their lives. ~

Do you have a rising 6th grader who will be getting vaccines shortly? Do you have a child aged 11-26? Do you have questions or concerns about HPV and the HPV vaccine and whether or not your child should receive it? Are you a health care provider or nurse who is interested in hearing the latest research and statistics on HPV and the HPV vaccine so you can educate your patients adequately?

If so, please join us as we watch Susie, Kelly, Kristen, Christine, and Tamika tell us their stories about life with HPV. We hope that this event will not only educate, but also increase community awareness of the Human Papilloma Virus (HPV) and the HPV vaccine which is the first vaccine that offers protection against several types of cancers.

JUNE 12th, 2018

6:00 – 8:00PM

PARRY MCCLUER MIDDLE SCHOOL

**** Medical Providers and Nurses can receive FREE CEU's for watching the film. ****

Event is open to the public and made possible by the Virginia Department of Health.

Following the film (90 minutes), there will be a panel of local health care providers available to answer questions. Heavy hors d'oeuvres will be provided, so we ask that you please register for this event using the Eventbrite link (<https://www.eventbrite.com/e/someone-you-love-the-hpv-epidemic-tickets-45933964725>) or the smart phone icon (below) by **June 5th, 2018**.
